### Informational

- Built to Learn Act Project Status Report

### Action Item

- Adoption of Final 14.39.02.06 COMAR Revisions
  - Jonathan Borghetti, Policy Analyst; Cassandra Viscarra, Deputy Director for Administration | 61*  |

### Action Item

- Healthy School Facility Fund FY 2023 Extension Request and Administrative Procedure Guide and Attachment 1 Baltimore City Public School System’s Schedule for Application and Approval of Project Funding Revisions
  - Arabia Davis, Funding Programs Manager; Gricel Muñoz, RFM | 63*  |

### Action Item

- Baltimore City Public Schools - FY 2023 Healthy School Facility Fund Approval of Project Allocations
  - Arabia Davis, Funding Programs Manager; Gricel Muñoz, RFM | 88*  |

### Action Item

- Use of Bond Proceeds for Capital Improvements in Leased Public School Buildings
  - Alex Donahue, Executive Director | 95*  |

### Announcements

*Action Item*
December 30, 2022

The Honorable Governor-Elect Wes Moore
State House, 100 State Circle
Annapolis, MD 21401

Sent via email only

Dear Governor-Elect Moore:

On behalf of the Public School Superintendents’ Association of Maryland (PSSAM) and the Maryland Association of Boards of Education (MABE), we congratulate you on your recent victory. We also are so pleased you chose a longtime friend of public education as your Lieutenant Governor, the Honorable Aruna Miller. We look forward to working with you both and your teams over the next four years.

The signatories on this letter represent educational leaders in the State – the superintendents or CEOs of the school districts and the local boards of education as the governing bodies. As you prepare your first budget, we would like to share our commonly held state education budget concerns and request your support to address them in the upcoming fiscal year.

This letter addresses:

1. A hold harmless funding request to address persistent declining enrollment in general education and in certain special student populations;
2. A small and targeted legislative change to the Blueprint formula to include special education, English Language Learners (ELL), and students experiencing homelessness in the Tier I prekindergarten (PreK) funding;
3. Inflationary adjustments for general operating and capital funding;
4. Capital planning needs for PreK and Career Technical Education (CTE) to fulfill the vision of the Blueprint; and,
5. Funding for a designated Blueprint Coordinator in each local education agency (LEA).

Over the last three years, both the Legislature and the Governor have recognized declining enrollment as an unfortunate outcome of the pandemic, and they have largely held the school systems harmless over their prior years’ budgets. We hoped we would have seen a faster return to public schools by now, but that recovery has been much slower than anticipated. Therefore, we find ourselves again seeking a general “hold harmless” for any LEA that will experience less State or local funding in FY ’24 than in FY ’23.
We are eager to work with you, along with the State Department of Education and the Department of Budget and Management, to craft the most equitable and adequate solution. As you likely have seen in the budget request from MSDE, enrollment among all student groups, as well as special populations of students, does not uniformly trend among the twenty-four (24) school districts. Some districts are up significantly in their Free and Reduced Meals (FARMs) enrollment, likely resulting from the successful pilot to use Medicaid in the direct certification process. Other systems have seen an increase in general student enrollment, but their numbers have fallen in special education or ELL populations. Again, we want districts to receive adequate funds to support their specific current, fluctuating enrollment trends until we see a return to the projections used by the Kirwan Commission.

We are not seeking any expansive legislative changes to the Blueprint. However, we are asking for a small and targeted “fix” in the PreK formula. It has been stated publicly that the Commission intended to include special education students along with English Language Learners and students experiencing homelessness in the Tier I PreK formula and that this omission was an error. We believe this is a small, yet meaningful change that must be addressed. We hope a supplemental budget, or inclusion in the initial budget and the (anticipated) budget reconciliation bill, would recognize this intention and fund these students in FY ’24 instead of waiting an additional year.

With respect to inflation, we find ourselves in the same precarious situation as the rest of the nation facing increased costs, resulting from extraordinary and unexpected cost spikes in virtually everything. Unfortunately, unlike the State, school systems do not carry or accrue large surpluses to help smooth out hard budget years. Therefore, we ask for your consideration of an inflationary bump in the foundation program for FY ’24 to reflect the new cost of doing business – arguably the most crucial public service “business” of public education.

This year, we have seen inflationary costs impact all our operations including food service and transportation. Further exacerbating the increased costs of operations, are the vastly different outcomes/reality of the “costs” to fund the comprehensive education reforms contained in the Blueprint. As you likely know, the funding needs and estimates used during the Kirwan Commission’s deliberations never contemplated a worldwide pandemic that would so significantly impact the national and international economies. From a practical perspective, because education funding is calculated based on enrollment and local wealth, the Kirwan enrollment estimates have not materialized. Pared with declining to flat enrollment growth, the dramatically unexpected inflation has created a perfect storm for the funding formula. Kirwan estimates reflected more historically accurate projections of inflation around 4% for FY ’24; we are currently facing inflation at 6-7%, depending on the type of goods and services we procure. Again, we would be more than happy to sit with you and your budget team to identify a reasonable inflationary adjustment for fiscal ‘24.

Our next two requests are directly connected to the Blueprint for Maryland’s Future, specifically unexpected capital needs to fully support the creation of world-class initiatives for PreK and CTE. Over the last twelve (12) months, it has become apparent that public schools will need to provide the majority of prekindergarten education. The Blueprint mandates agreements between school systems and private providers who are expected to provide from 30%, increasing to 50%
of all state-funded full-day prekindergarten. Unfortunately, there has been extremely low interest from the private provider community. At the same time, the public is expecting the Blueprint’s promise to deliver vastly expanded full-day prekindergarten. While we hope and believe more private providers will join the mixed delivery system, it is apparent that the goal of a 50/50 private and public split is likely unattainable. Therefore, we are anticipating significant growth in capital needs to accommodate our smallest learners. PreK classrooms are certainly magical learning spaces for children, but they are also very expensive to build, staff, and maintain.

On the other end of the PreK-12 experience is the Blueprint’s focus on providing meaningful and industry-accepted credentials through CTE and apprenticeships. Partnerships with existing industries all over the State will certainly grow, but there will also be a need for the public schools to step up to provide more hands-on practical experiences for CTE students. We anticipate capital need for both new technical high schools and major renovations of comprehensive high schools to accommodate these CTE programs.

Therefore, we are asking for your consideration in the capital budget -- preferably with PAYGO funding -- to allow the 24 systems to work with the IAC on planning, design, and forecasting for these two important components of the Blueprint – PreK and career technical education.

As with our operating expenses, capital costs have soared astronomically due to labor costs, huge increases in materials such as steel, and supply chain difficulties. In one system, a project involving identical modular buildings doubled in cost over a single year period. Another district has seen as much as 35-40% cost increases on systemics, and as much as 50% or higher increases on major projects. Eighteen months ago, they were relying on costs of $365/square foot that are now coming in at $500/square foot. Further, districts are being informed that due to challenges in the bond markets, reductions in anticipated Built to Learn (BTL) funding may be lower; in one district, they were told to expect a $63 million reduction from their original estimate.

For these reasons, we are also asking for an inflationary increase in capital funding to accommodate these costs, and to complete projects currently in the pipeline or under construction. We are requesting PAYGO funding because of the current surplus rather than the more cumbersome use of traditional CIP bond funding.

Lastly, we are asking for a $150,000 line-item allowance for each LEA to compensate and support a full-time Blueprint Coordinator. There is precedent for this request in the Blueprint. In the concentration of poverty and the community schools Blueprint funding, there was a fixed amount of $83,330 per district for systems with community schools to use for coordinator salaries. That personnel funding was a meaningful and important addition in State formula funding, recognizing the value of a professional position responsible for carrying out the intended Blueprint reforms. This is certainly also true for the position of Blueprint Coordinator.

In the final version of HB 1300, the Legislature recognized the value of a designated Blueprint Coordinator appointed jointly by the local governing body and the LEA, but that requirement did not come with any State funding. The position was to be created by July 1, 2021, and all districts were in compliance within one or two months of that deadline. However, over the last eighteen
months we now have a clearer sense of the roles and responsibilities of the coordinators. The forethought of the Legislature in requiring this position was tremendous, but the workload for these coordinators is also enormous. In July of 2021, the role of the coordinators was unclear and many districts added this responsibility to existing staff. Many of the coordinators are wearing multiple hats in their districts, which is difficult, especially in smaller districts where the CFO or COO is also acting as a coordinator. We believe a line item in the budget, similar to the community schools coordinator, would provide an equitable funding opportunity for all districts to employ a full-time Blueprint Coordinator.

Again, we greatly anticipate working with you and your administration, and we offer our best wishes for a heartfelt and happy holiday for you and your family. To further discuss these items, please feel free to contact Mary Pat Fannon, Executive Director of PSSAM at marypat.fannon@pssam.org or 410-935-7281 as well as Frances Glendening, Executive Director of MABE, at fglendening@mabe.org.

Sincerely,

Dr. Sean Bulson, Superintendent, Mr. Joseph Goetz, Board President, Harford County Public Schools Kent County Public Schools President, PSSAM President, MABE

CC:  Lieutenant Governor-Elect Aruna Miller
Local Superintendents
The Honorable Bill Ferguson, President, Senate of Maryland
The Honorable Adrienne Jones, Speaker, Maryland House of Delegates
State Superintendent Choudhury
Members of the Maryland State Board of Education (via Executive Director Zach Hands)
The Honorable Ben Barnes
The Honorable Guy Guzzone
The Honorable Brian Feldman
The Honorable Vanessa Atterbeary
Helene Grady, Secretary, Department of Budget and Management
Fagan Harris, Chief of Staff
The Honorable Eric Luendetke, Chief Legislative Officer
Members of Accountability and Implementation Board (via Executive Director Rachel Hise)
Alex Donahue, Executive Director, Interagency Commission on School Construction (IAC)
The Honorable Ed Kasemeyer, Chair, IAC
John Woolums, MABE
Ms. Cheryl Bost, President, MSEA

mpf/12/20/22
Mr. Dick Lombardo

Dear Mr. Lombardo,

I write to sincerely thank you for your five years of service as a member of the Interagency Commission on School Construction. Since your original appointment in 2018 by Governor Hogan, you have served as a knowledgeable, valued, and constant member of the Commission, providing essential insight to our shared mission to achieve a safe, healthy, and educationally sufficient learning environment for every child attending a public school in Maryland.

The members and staff of the Commission are very grateful for the knowledge you lent during your time as a member. Your 42 years in the construction industry and expertise on project development, as well as your experience as a parent and grandparent, contributed a needed and valued perspective to the critical and nuanced decisions we make to advance the sufficiency of our state's public school facilities.

We are grateful for your presence and dedication to the IAC's efforts over the last five years.

Sincerely,

Edward J. Kasemeyer
Chair, IAC
DRAFT Meeting Minutes – December 8, 2022

Call to Order:
Chair Kasemeyer called the video-conference meeting of the Interagency Commission on School Construction to order at 9:00 a.m.

Members in Attendance:
Edward Kasemeyer, Appointee of the President of the Senate, Chair
Secretary Ellington Churchill, Department of General Services, Vice-chair
Superintendent Mohammed Choudhury, Maryland State Department of Education
Michael Darenberg, Appointee of the Governor
Linda Eberhart, Appointee of the Speaker of the House
Brian Gibbons, Appointee of the Speaker of the House
Gloria Lawlah, Appointee of the President of the Senate
Valdis Lazdins, Designee for Acting Secretary Sandy Schrader, Maryland Department of Planning
Dick Lombardo, Appointee of the Governor

Members Not in Attendance:
None

Revisions to the Agenda:
Alex Donahue, Acting IAC Executive Director, informed the IAC that Cecil County has opted to provide a written Capital Improvement Program (CIP) appeal only instead of presenting.

Public Comment:
There was no public comment.

IAC Correspondence:
There was no correspondence.

1. Consent Agenda – [Motion Carried]
   Upon a motion by Secretary Churchill, seconded by Mr. Darenberg, the IAC voted unanimously to approve the consent agenda.
   A. Approval of the November 10, 2022 Minutes
      To approve the minutes of the November 10, 2022 Interagency Commission on School Construction Meeting.
   B. Contract Awards
      To approve contract procurement as presented.
   C. Approval of Revisions to Previously Approved Contracts
      To approve the revisions to previously approved contract awards as presented.
D. **Project Allocation Reversions**
   To approve the reversion of the amounts presented to the appropriate statewide contingency accounts.

E. **Baltimore City Public Schools - City College High School BTL Computation Worksheet Revision**
   To approve the revision of the Capital Improvement Program/Built to Learn computation worksheet for the FY 2023 Baltimore City College High School #480 (PSC 30.110) to establish a Maximum State Allocation of $128,913,000.

F. **Built to Learn Act Project Status Report** – [Informational Only]

G. **Prince George's County Public Schools - FY 2022 Aging Schools Program Project Extensions** – [Informational Only]

H. **Informational Facility Status Changes** – [Informational Only]

2. **St. Mary's County Public Schools - Request to Rescind Lettie Marshall Dent Elementary School Limited Renovation Project** – [Motion Carried]
   Arabia Davis, IAC Funding Program Manager, and Gene Shanholz, IAC Regional Facilities Manager (RFM), presented St. Mary's County Public Schools' (SMCPS) request to rescind the Lettie Marshall Dent Elementary School Limited Renovation. Escalating costs and impacts of the current market on the project estimate meant that a bid could not be awarded based on SMCPS's revised estimate. The funds will be transferred to SMCPS's reserved appropriation account and applied to the FY 2024 CIP to meet inflated costs demands.

   Upon a motion by Mr. Lombardo, seconded by Ms. Eberhart, the IAC voted unanimously to approve the request to rescind the St. Mary’s County Public Schools (SMCPS) FY 2023 Capital Improvement Program (CIP) Lettie Marshall Dent Elementary School Limited Renovation Project (PSC 18.017.23) and to transfer the State allocation totaling $4,970,000 to the account reserved for SMCPS.

3. **Capital Improvement Program Overview Presentation** - [Informational Only]
   Acting Executive Director Donahue presented an overview of the CIP and its administrative process.

4. **FY 2024 Capital Improvement Program 75% Project Approvals** - [Motion Carried]
   Ms. Davis presented IAC staff recommendations for 75% of the preliminary school construction allocation for the FY 2024 CIP. Staff recommended the approval of 7 planning requests and 109 funding requests, totaling $210,000,000, for the 75% allocation round based on the Governor's Preliminary Capital Budget. LEAs presented oral testimony appealing staff recommendations. Staff noted a number of LEAs that provided written testimony.

   Upon a motion by Superintendent Choudhury, seconded by Ms. Eberhart, the IAC voted unanimously to approve the Fiscal Year 2024 75% Capital Improvement Program (CIP) Allocations and Planning Approvals for each school system and the Maryland School for the Blind as shown in the presented Summary of 75% Recommendation Details by Project in Column L, titled "Recommended 75% New Authorization," and contingent upon appropriation in the FY 2024 State Capital Budget and to authorize the IAC staff to make adjustments to project allocations to avoid over and under funding of a project. Approval of projects with a “U” status is contingent upon resolution of outstanding issues.
5. **Anne Arundel County Public Schools - Old Mill South Middle School Rescission of LP, Approval of Cost per Square Foot Increase, and BTL Funding Allocation - [Motion Carried]**

Ms. Davis and Grisel Muñoz, RFM, presented three requests by Anne Arundel County Public Schools (AACPS): first, a request to rescind the Local Planning approval for the Old Mill Middle School South replacement project from the FY 2023 CIP due to change in funding source; second, a request to increase the IAC’s adopted cost per square foot due to higher costs as a result of market conditions under COMAR 14.39.02.07C; and third, approval of funding in the amount of $31 million through the Built to Learn program.

Upon a motion by Ms. Eberhart, seconded by Mr. Gibbons, the IAC voted unanimously to:

1. Rescind Local Planning (LP) approval of Old Mill Middle School South (PSC 02.133) from the FY 2023 Capital Improvement Program (CIP).
2. Approve the request to change the Maximum State Construction Allocation for Old Mill Middle School South by adjusting the FY 2023 Cost Per Square Foot under COMAR 14.39.02.07C. from $358/sf to $380/sf as reflected in the presented project worksheet.
3. Approve the Built to Learn (BTL) funding request for Old Mill Middle School South with a total State funding allocation of $31,149,000.

6. **Cecil County Public Schools - Elkton Middle School Roof Replacement Project - Maximum State Construction Allocation Increase - [Motion Carried]**

Ms. Davis and Eileen Gladd, RFM, presented Cecil County Public Schools’ (CCPS) request to amend the Maximum State Construction Allocation for the FY 2023 CIP Roof Replacement project at Elkton Middle School by transferring $76,000 from CCPS’s Prior Year Reserve Appropriations Account. CCPS received a bid that was 5.5% higher than the 2021 estimate. This amendment changes the State’s Share from $1,376,000 to $1,452,000.

Upon a motion by Mr. Gibbons, seconded by Secretary Churchill, the IAC voted unanimously to decrease the Cecil County Public Schools (CCPS) reserved prior year appropriations account by $76,000 and to subsequently approve an amendment to the CCPS FY 2023 Capital Improvement Program (CIP) to increase the Elkton Middle School (PSC 07.029) roof replacement project allocation by $76,000 from $1,376,000 to $1,452,000.

7. **Harford County Public Schools - Pass-Through Grant Funding Approval - [Motion Carried]**

Ms. Davis presented Harford County Public Schools’ funding request for the Pass-Through Grant (PTG) program for a HVAC system project for the Kindergarten Annex Building at Churchville Elementary School.

Upon a motion by Superintendent Choudhury, seconded by Mr. Gibbons, the IAC voted unanimously to approve the Pass-Through Grant program projects as presented in this item with a total allocation of $398,906 subject to reconciliation and potential adjustment at project closeout.

8. **Montgomery County Public Schools - Amendment of FY 2021, FY 2022, and FY 2023 Capital Improvement Programs - [Motion Carried]**

Ms. Davis, presented Montgomery County Public Schools’ (MCPS) request to cancel a total of 11 HVAC projects and 11 Roof projects and transfer the funds to MCPS reserved prior year appropriations account. The request is due to decreases in the anticipated FY 2023 local share and unexpected increases in construction costs that have inflated the overall project budget. Funding has
caused delays in moving forward with the projects. The funds will be reapplied to the FY 2024 CIP to address potential fiscal constraints.

Upon a motion by Ms. Lawlah, seconded by Ms. Eberhart, the IAC voted unanimously:
1. To approve the cancellation of 11 HVAC and 11 Roof projects in Montgomery County Public Schools (MCPS) funded in Fiscal Years 2021, 2022 and 2023 Capital Improvement Program (CIP); and,
2. Transfer $29,999,000 to the Local Education Agencies Reserved Prior Year Appropriations Account for distribution to eligible projects in the FY 2024 CIP.

9. Executive Session - [Motion Carried]
Pursuant to §3-305(b)(1) of the General Provisions Article, Annotated Code of Maryland, and with unanimous agreement by all members present, the Commission met in closed session on Thursday, December 8, 2022 to discuss personnel matters. All members were present at the closed session. Also in attendance were Acting Executive Director Donahue, and Heidi Dudderar, Assistant Attorney General for the IAC. The Executive Session commenced at 10:42 a.m.

The Executive Session concluded at 10:55 a.m. Secretary Churchill, Chair of the Executive Director Search Committee, explained the process that was conducted to find a suitable candidate for the IAC Executive Director position. The Commission voted in the Executive Session to select Acting Executive Director Donahue to serve as the new Executive Director. Commission members expressed their continued confidence in his ability to serve in this capacity.

Announcements:
None

Adjournment:
Upon a motion by Mr. Gibbons, with a second by Secretary Churchill, the IAC voted unanimously to adjourn the meeting at 11:01 a.m.
**Item 1B. Summary Of Contract Awards**

**Motion:**
To approve contract procurement as noted below.

The IAC staff has reviewed the contract procurement for the following State approved projects and recommends IAC approval.

Annapolis, MD 21401

Re: Wiley H. Bates Middle School
HVAC Systemic Renovation Scope Study
RFP Number: 18CN-043-048

Dear Vince,

James Posey Associates, Inc. has engaged Columbia Engineering, Inc. for structural engineering services and MK Consulting Engineers, LLC for civil engineering services for the referenced project. Participation from these consultants satisfies 11.6-percent of the project’s 15-percent minority participation goal. The remaining design work for the project is a single specialized engineering task. For this reason, we request relief from the remaining 3.4-percent of the minority participation goal due to the specialized nature of this systemic renovation project.

If you need additional information or if there are any questions, please do not hesitate to contact me.

Sincerely,

Michael P. Sherren, PE, LEED AP
Vice President

cc: Mr. T. Slade Van Tine - AACPS, Project Manager, Systemics

Chairman Emeritus
W. Carl Hossfeld, Jr., PE

Mechanical & Electrical Consulting Engineers
Since 1911
- Perform field investigation of the existing building, associated structure, and MEP/FP systems.
- Develop an existing-conditions narrative describing the existing building, structure, and MEP/FP systems, including their current condition, noted deficiencies, and remaining life expectancy.
- Develop recommended mechanical system replacement options. Replacement options will address both infrastructure and distribution system components.
- Evaluate site disturbance impact of required utility upgrades including new incoming electrical service, fire service/sprinkler improvements, new incoming gas service, new chiller pad/enclosure, and portable classrooms.
- Attend a review meeting with AACPS to discuss mechanical system replacement options and prepare minutes from this meeting.
- Discuss impact of recommended replacement mechanical system on other building components, including architectural (both floor plan and ceiling systems), structural, electrical, plumbing, fire protection (both sprinkler and fire alarm), and site.
- Develop an initial project phasing diagram, including anticipated construction durations and temporary conditions (such as portable classrooms).
- Establish available project alternates and associated impact on major mechanical infrastructure components.
- Develop an order of magnitude cost estimate addressing both the base bid and project alternate costs.
- Attend a review meeting with AACPS to discuss project phasing recommendations, alternates, and cost estimate data. Prepare minutes from this meeting.
- Finalize scope study based on meeting comments and submit a final copy to AACPS.

**Exclusions**

- Detailed calculations, design or drawings (both building and site).
- Determination of the existing sprinkler system's hydraulic design criteria without Owner-provided as-built sprinkler drawings.
- Energy modeling and life cycle cost analysis comparing various systems.
- Application for utility rebate incentives, including BGE Energy Savers Program.
- Analysis to determine viability of LEED certification, including review of preliminary checklists.
- Review of existing utility bills.
- Investigation for the existence of, or design for the removal of, hazardous materials such as lead paint, asbestos, etc.
- Testing of existing systems, materials, and equipment to determine capacity or condition, including obtaining airflow measurements.
- The physical opening of electrical equipment covers to view interior conditions. Assistance from the Owner's maintenance staff or facility electrician is required to open panel boards, switchboards, switchgear, motor control centers, and other electrical equipment.
Mr. Vincent K. O'Brien
May 7, 2021
Page 3

- Test pits, testing, balancing or payment for construction labor to obtain samples or cut inspection openings in structures or components.
- Surveying, utility designation, and geotechnical engineering services.
- Property title reports; EFAs, floodplain studies, and/or wetland delineations; forest conservation and forest delineation; sensitive area reports; Phase I and Phase II environmental engineering; traffic studies; historical and/or archaeological assessments.
- Printing and reproduction. Final scope study will be provided in electronic (PDF) format.

Schedule

Our work will begin upon receipt of your notice to proceed (NTP). We anticipate NTP will be provided in mid-May 2021, with an August 15, 2021 completion timeframe for this scope study.

Professional Services Fee

Our lump sum fee, including expenses and reimbursable costs, for this scope study is as follows:

- MK Consulting Engineers (Civil Engineering, MBE): $ 3,470
- Columbia Engineering (Structural Engineering, MBE): $ 4,800
- Mark J. Aaby, PE (Fire Protection Engineering): $ 12,000

Total Lump Sum Project Fee: $ 71,470

Invoices will be sent monthly and will be based on percentage of engineering services completed.

This proposal is valid 90 days from date of issuance.

Vince, we hope that this proposal is acceptable and look forward to working with AACPS on this project. If you have any questions or need additional information, please contact me.

Sincerely,

Michael P. Sherren, PE, LEED AP

Re: Wiley H. Bates Middle School
HVAC Systemic Renovation
RFP Number: 18CN-043-059

Dear Vince,

We are pleased to provide the following proposal for professional engineering services for the referenced project. Attached to this letter is the completed Anne Arundel County Public Schools (AACPS) Minority Business Enterprise package. James Posey Associates and the consultants listed in this letter will provide the services as described below.

Project Scope

The project scope is based on the recommendations set forth within the HVAC Systemic Renovation Scope Study, dated August 11, 2021, developed by James Posey Associates, which provides a description of the project requirements and general project scope of work. We understand that AACPS does not desire to proceed with Scope Study project alternates 1-1 (typical classroom casework) and 1-4 (interior wall painting). In addition, we understand that project phasing will be accomplished without the use of additional onsite portable classrooms.

Scope of Professional Services

JPA will provide engineering and design services as necessary to support the procurement of the project described. Services including preparation of plans and specifications, shop drawing review, construction consultation, construction observations and preparation of record drawings will be provided any time up to the final acceptance of all construction work associated with identified project. Specific services include the following:

Design Phase

- Field investigation and documentation of existing conditions and creation of demolition drawings. Confirm that physical conditions will support design of new systems.
- Engineering design and completion of systemic project construction documents to accomplish the scope of project and suitable for bidding and permits.
- Develop phasing plan to allow construction without interruption to academic activities. We understand that project phasing will be accomplished without the use of additional onsite portable classrooms.
- Prepare a building code analysis and complete the associated code plan drawing based on current code requirements, existing historical building code drawing documentation, and the proposed scope of work.
- Attend project review meeting with City of Annapolis Plans Review and Fire Marshal.
- Attend on-board review meetings with AACPS to discuss review comments for the 50%
and 95% CD submission documents and prepare minutes and written responses to comments following meetings.

- Provide engineering calculations and documentation for any BGE Smart Energy Savers® prescriptive utility rebate incentive applications completed by AACPS.

- 50% Contract Document submission: (6 hard copy sets + PDF Files – 3 hard copy sets for AACPS review and 3 hard copy sets for IAC review anticipated. Note that the final deliverable requirements for the IAC will be coordinated prior to the DD submission)
  - Provide drawings and specifications for AACPS and IAC reviews. Prepare calculations package and necessary paperwork for IAC DD phase review.
  - Provide copy of estimate of probable construction cost.

- 95% Contract Document submission: (6 hard copy sets + PDF Files – 3 hard copy sets for AACPS review and 3 hard copy sets for IAC review anticipated. Note that the final deliverable requirements for the IAC will be coordinated prior to the CD submission)
  - Provide drawings and specifications for AACPS and IAC reviews. Prepare calculations package and necessary paperwork for IAC CD phase review.
  - Provide copy of estimate of probable construction cost.
  - Complete permit application and submit to City of Annapolis. Prepare written responses to permit review comments.

- 100% Contract Documents
  - One hard copy set of reproducible, two hard copy sets bound, and PDF files of the final drawings.
  - One unbound bond copy, two bound copies, and PDF files of final specifications.
  - Final engineering cost estimate.

Bid Phase

- Attend pre-bid meeting.
- Provide clarification to bidders as needed.
- Prepare addenda as required.
- Attend bid opening at AACPS.

Construction Administration Phase

- Review submittals and close-out documentation (balance reports, operations and maintenance manuals, etc.).
- Attend progress meetings, project walk-through, and conduct field observation bi-weekly. Minutes to be recorded by JPA. Estimated project duration is approximately 2.5 years, inclusive of multiple phases of construction over three summers and two academic school years.
- Respond to contractor requests for information (RFIs).
- Review change order requests.
- Review contractor applications for payment.
- Conduct final observation of the work and prepare punch list for each phase of work, including back check of list after contractor is complete.
• Fire Alarm Commissioning: Aaby Fire Protection Engineering has included 8 construction phase site visits to review the installed fire alarm system.
• Restoration Engineering Inc. has included the following site visits during construction to observe details, materials, and installation procedures: 4 visits during summer 2023, 6 visits during summer 2024, and 12 visits during summer 2025.
• Prepare record drawings based on contractor’s as-built drawings. Record drawings to be submitted to AACPS in AutoCAD and PDF formats.

Exclusions
• Investigation or testing for existence of, or design for removal of, hazardous materials such as lead paints, asbestos, etc.
• Design and construction administration phase services associated with HVAC Scope Study project alternates 1-1 (typical classroom casework) and 1-4 (interior wall painting).
• Design of portable classrooms to accommodate project phasing.
• Printing of drawings and specifications for bidding or construction.
• Multiple construction documents and/or bid packages.
• Permit fees.
• Commissioning services or training of operating staff, beyond the fire alarm commissioning scope of services included during the construction administration phase.
• The physical opening of electrical equipment covers to view interior conditions. Assistance from the Owner’s maintenance staff or facility electricians is required to open panelboards, switchboards, switchgear, motor control centers, and other electrical equipment.
• Commissioning re-inspection of sprinkler and fire alarm components.
• Design of solar heating, thermal storage, geothermal or non-conventional systems.
• Changes to design in response to scope or value engineering changes after completion of design.
• Building information modeling (BIM). Construction documents will be prepared using 2D AutoDesk® AutoCAD® software.
• Calculations and documentation associated with IgCC compliance or LEED certification.

Schedule
The anticipated design schedule for this project is as follows:

- Notice to Proceed (NTP)**: September 1, 2021
- 50% Submission: Week of December 13th, 2021
- On-Board Review: Week of December 20th, 2021
- 95% Submission: Week of April 18th, 2022
- On-Board Review: Week of April 25th, 2022
- Final Documents: August 5, 2022
- Bids Due: Week of September 20, 2022
- Construction Starts: November 2022
- Substantial Completion: September 2025

** Should NTP be received after September 1, 2021, the project schedule will shift proportionally.
Professional Services Fees

Lump sum fee breakdown for professional services, including expenses, is as follows:

<table>
<thead>
<tr>
<th>Company</th>
<th>Construction Documents</th>
<th>Bidding Phase</th>
<th>Construction Administration</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>James Posey Associates, Inc. (Mechanical and Electrical)</td>

<td>$16,000</td>
<td>$170,500</td>
<td>$1,214,500</td>
</tr>
<tr>
<td>MK Consulting Engineers, LLC. (Civil; MBE)</td>
<td>$18,900</td>
<td>$0</td>
<td>$3,500</td>
<td>$22,400</td>
</tr>
<tr>
<td>Columbia Engineering, Inc. (Structural; MBE)</td>
<td>$98,400</td>
<td>$4,000</td>
<td>$20,000</td>
<td>$122,400</td>
</tr>
<tr>
<td>Aaby Fire Protection Engineering (Fire Protection)</td>
<td>$88,000</td>
<td>$3,000</td>
<td>$55,000</td>
<td>$148,000</td>
</tr>
<tr>
<td>Restoration Engineering, Inc. (Roofing)</td>
<td>$35,950</td>
<td>$2,615</td>
<td>$48,340</td>
<td>$86,905</td>
</tr>
<tr>
<td><strong>Subtotals</strong></td>
<td><strong>$1,269,250</strong></td>
<td><strong>$25,615</strong></td>
<td><strong>$297,340</strong></td>
<td><strong>$1,592,205</strong></td>
</tr>
</tbody>
</table>

Fee provided is for design, competitive bidding, and construction administration associated with the base project and all selected project alternates. Construction documents for alternates will be arranged in such a manner that they can be bid by AACPS at a later date, if not accepted at this time. Construction administration costs are based on construction being completed in 2025.

Project Budget

We understand that the total construction budget for this project, including anticipated project alternates, is approximately $268.6M.

Invoices will be sent monthly and will be based on percentage of engineering services completed.

If there are any questions, please do not hesitate to contact me.

Sincerely,

Michael P. Sherren, PE, LEED AP
Vice President

PROPOSAL/QUOTATION

PROJECT: AACPS BATES MS RENO

ATTENTION: Mr. AACPS

REFERENCE DOCUMENTS:
1. Mechanical Plans M01 through M7.5 by James Posey Associates dated 5/2/2022
2. Specifications 230900 by James Posey Associates dated 5/2/2022

SCOPE of WORK:
PROVIDE & INSTALL RACEWAY, CONDUCTORS, AND TERMINATIONS FOR THE ABOVE REFERENCED PROJECT LIMITED TO THE FOLLOWING.

TASKS:
1. DEMOLITION: Cut, cap and make safe control wiring for select equipment to allow for removal by the mechanical contractor.
2. AHU's 1, 2, AND 3 (INDOOR UNITS): Unit to come with OA/AFMS/OA damper and return air damper. We will provide and install control panel Honeywell BACnet controller with I/O modules, (1) room temperature/humidity sensor, supply, return, mixed, preheat coil, and cooling coil temperature sensors, (1) supply fan, (1) return fan and OA AFMS control signals, high and low limit static pressure switches, (1) supply fan stop/start, status and alarm relays, recirculation pump stop/start and status relays, (1) drain pan switch, low temperature detector, supply and return duct smoke detector alarm relays, (3) control valve signals, (2) VFD speed signals, outside, return and exhaust air damper actuators and associated control wiring. Provide and install (2) VFD's (line and load wiring by the electrical contractor). Provide (3) control valves, (2) AFMs and (2) dampers for installation by the mechanical contractor. Provide and install (2) VFD's (line/load wiring by the electrical contractor). Provide programming and commissioning.
3. RUPS (1.3): Unit to come with 24kW space for DDC controllers, outside, return and exhaust dampers, all DX and gas heat operating/safety controls. We will provide and install Honeywell BACnet controller with I/O modules, condensing unit start/stop and status relays, air flow switch, compressor start/stop and status relays, compressor modulating output, gas burner start/stop relay and modulating output, (1) room temperature/humidity/CO2 sensor, supply, cooling coil, and mixed air temperature sensors, OA/AFMS control signal, (1) room pressure transmitter, low limit static pressure switch, (1) supply and (1) return fan stop/start, status and alarm relays, supply and return duct smoke detector alarm relays, (2) VFD speed signals, outside and return air damper actuators and associated control wiring. Provide (1) OA/AFMS for installation by the mechanical contractor. Provide programming and commissioning.

CONTINUED PAGE 1 OF 5
4. DOAS UNITS W/ DX AND GAS HEAT [9]: Unit to come with packaged VFD's, all burner/DX operating/safety controls and outside, exhaust, EA bypass, recirc dampers and 24"x24" space for DDC controllers. We will provide and install Honeywell BACnet Spyder controller with I/O modules, condensing unit start/stop and status relays, general alarm and modulating output; Gas burner status relay, general alarm and modulating output; exhaust air, outside air, entering DX, leaving HC and unit discharge temperature sensors; entering DX and (1) room humidity sensor; low limit static pressure switch, airflow switch, (1) supply and (1) exhaust fan stop/start, status and alarm relays; enthalpy wheel start/stop, status and alarm relays, enthalpy wheel rotation sensor, supply and return duct smoke detector alarm relays, (3) VFD speed signals, outside, exhaust, (2) EA bypass and recirc dampers actuators and associated control wiring. Provide programming and commissioning.

5. DUCTLESS SPLIT [11]: Unit to come with factory wired controls and remote thermostat. We will mount and wire the thermostat, interlock the outdoor unit and provide and install (11) zone sensors with associated control wiring to closest DDC controller for monitoring and alarming purposes. Provide programming and commissioning.

6. DSS ELEVATOR [1]: Unit to come with factory wired controls and remote thermostat. We will mount and wire the thermostat, interlock the outdoor unit and provide and install (1) zone sensor with associated control wiring to closest DDC controller for monitoring and alarming purposes. Provide interlock wiring for (2) duct smoke detectors. Provide programming and commissioning.

7. FOUR PIPE FCU [64]: Provide and install a Honeywell BACnet Spyder controller, zone sensor, supply air sensor, (1) drain pan sensor, supply fan stop/start and status relays, (2) control valve signals and associated control wiring. Provide (2) control valves for installation by the mechanical contractor. Provide programming and commissioning.

8. FCUS WITH HW AND DX [9]: Provide and install a Honeywell BACnet Spyder controller, zone sensor, supply air sensor, (1) drain pan sensor, supply fan stop/start and status relays, condensing unit stop/start and status relays, (1) control valve signal and associated control wiring. Provide (1) control valve for installation by the mechanical contractor. Provide programming and commissioning.

9. CENTRAL PLANT: We will provide and install a controls panel, JACE-8 controller with I/O modules, (1) global outside air temperature/humidity sensor, (1) pipe temperature sensors, (4) differential pressure transmitters, (2) flow meters, (1) glycol feeder alarm, (6) pump stop/start relays, status relays, and alarm; (6) pump speed signals, (3) boiler enable and status relays, general alarms, setpoints, emergency stop relay and BACnet integration; (1) chiller enable and status relays, setpoint and BACnet integration; (5) control valve signals and associated control wiring. Provide (5) control valves, (10) wells and (2) flow meter kits for installation by the mechanical contractor. Provide and install (6) VFD's (line/load wiring by the electrical contractor). Provide programming and commissioning.

10. HYDRONIC-UH - PUH [38] CUH [21] DDC: Provide and install a zone sensor, aquastat, fan stop/start relay, control valve signal and associated control wiring to closest DDC controller. Provide control valve for installation by the mechanical contractor. Provide programming and commissioning.

12. CONVECTORS HW [11]: Provide and install a bulb temperature sensor, control valve signal and associated control wiring to closest DDC controller. Provide control valve for installation by the mechanical contractor. Provide programming and commissioning.

13. FINNED TUBE RADIATION [22]: Provide and install (22) room temperature sensors, (22) control valve signals and associated control wiring to closest DDC controller. Provide (22) control valves for installation by the mechanical contractor. Provide programming and commissioning.
14. VRF SYSTEM: All equipment to come with factory installed controls and remote thermostats. System Controller to come with BACnet card for integration to EMS. We will mount and wire System Controller, (20) thermostats and provide and install interlock wiring between (20) indoor units, (3) branch selectors and (3) outdoor units. Provide and install (3) override switches. All programming, start-up and warranty to be by the equipment manufacturer. Provide programming and commissioning.

15. EFS WITH ROOM TEMPERATURE AND DAMPER (3) TYPE-B: Provide and install a zone temperature sensor, stop/start relay, status relay, damper actuator and associated control wiring to closest DDC controller. Provide (1) damper for installation by the mechanical contractor. Provide programming and commissioning.

16. SF-1 WITH ROOM TEMPERATURE AND DAMPER TYPE-B: Provide and install the zone temperature sensor, stop/start relay, status relay, damper actuator and associated control wiring to closest DDC controller. Provide (1) damper for installation by the mechanical contractor. Provide programming and commissioning.

17. EF-6 KITCHEN: Provide and install a hood status relay, fan stop/start relay, status relay, damper actuator and associated control wiring to closest DDC controller. Provide (1) damper for installation by the mechanical contractor. Provide programming and commissioning.

18. TEMPORARY HEATING WATER SYSTEM: Provide (2) steam valve signals and associated wiring to the closest controller. Provide (2) valves for installation by the mechanical contractor. Provide programming and commissioning.

19. EMERGENCY SHUTDOWN SWITCH (2): Provide and install an emergency fan disconnect switch and associated control wiring to closest DDC controller. Provide programming and commissioning.

20. CO DETECTION (2): Provide and install (1) Honeywell E3POINT CO detector in the boiler room, (1) Honeywell E3POINT CO detector in the kitchen, and associated control wiring to closest DDC controller for alarming purposes. Provide programming and commissioning.

21. NATURAL GAS DETECTION SYSTEM: Provide and install (1) Honeywell E3POINT CH4 detector, (1) remote CH4 detector, (2) audible alarms and associated control wiring to closest DDC controller for alarming purposes. Provide programming and commissioning.

22. HIGH TEMPERATURE REF/REEZER ALARMS (2): Provide and install (2) temperature sensors, (2) manual reset push buttons with audible alarms and associated control wiring to closest DDC controller for alarming purposes. Provide programming and commissioning.

23. DHW PUMPS (3): Domestic Water Heaters, pumps and all controls are existing to remain. We will provide connections to new system controllers. Provide programming and commissioning.

24. BUILDING STATIC PRESSURE MONITORING (4): Provide and install (4) additional building static pressure transmitters for monitoring and trending. Provide programming and commissioning.

25. NEW THERMOSTAT GUARDS (4): Provide and install (4) plastic thermostat guards.

26. TABLET/TRAINING: Provide an allowance of $10,000 for tablet and training.

27. NETWORK: Provide and Install (3) JACE-8100 supervisory controllers, (1) JACE-8025 supervisory controller and BACnet communication cabling to new Honeywell controllers, (3) boilers, (1) chiller and VRF system controller. Provide system graphics on existing workstation.

28. HYDRONIC-UH (1) [ALTERNATE-1]: Provide and install a zone sensor, aquastat, fan stop/start relay, control valve signal and associated control wiring to closest DDC controller. Provide control valve for installation by the mechanical contractor. Provide programming and commissioning.
PROJECT:
AACPS BATES MS RENO

ATTENTION:
Mr. AACPS

TASKS CONTINUED:
29. VRF CASSETTES (2) [ALTERNATE-1]: All equipment to come with factory installed controls and remote thermostats. We will mount and wire (2) thermostats and provide and install interlock wiring between (2) indoor units. All programming, start-up, and warranty to be by the equipment manufacturer. Provide programming and commissioning.

30. DHW PUMPS (3) [ALTERNATE-2]: Domestic hot water heaters shall operate under factory packaged controls. We will provide and install (1) pump stop/start and status relay, (1) pipe temperature sensor and associated control wiring to closest DDC controller. Provide programming and commissioning.

EXCLUSIONS:
1. All Type-C exhaust fan timers and wiring by Div-26.
2. All wall rough-in for temperature, humidity, CO2, etc., is provided by Div-26.
3. All work associated with fire alarm system, smoke dampers and fire dampers.
4. Cutting, patching and painting.
5. Demolition and installation of mechanical equipment, piping, ductwork, valves, etc.
7. Installation of any mechanical equipment, piping, wells, ductwork, AFMS, dampers, pressure taps and valves.
8. Installation of smoke detectors.
11. Startup and warranty of controls and equipment not provided and installed by EASL.

NOTES:
1. Access, escorts and parking to be provided by owner.
2. Existing conduit will be reused to the extent possible.
3. FCU equipment power will be used for DDC controls.
4. Price includes engineered drawings, demonstration and 2-year warranty.
5. Price reflects open plenum rated cable installation above accessible ceilings and inside RTU, EMT where exposed and GRC in boiler mechanical room.
6. Work is limited to equipment specified in this proposal.

ANNE ARUNDEL COUNTY PUBLIC SCHOOLS
2022-2023 REQUIREMENTS CONTRACT
Bid # 22SC-236
Northstar Contracting Group, Inc.

SCHOOL: Bates Middle & Bates Art Center

W.O.#
P.O.#

Description of Work:

Bates Middle:
Removal of approximately 110,000 sq. feet of asbestos mastic dots/patties exposed in Lobbies & Stairwells or above the drop ceilings located throughout the Classrooms, Offices, Hallways, Cafeteria, Media Center & Locker Rooms (dressing area only). Removal of the 1’x1’ ceiling tiles adhered to the mastic dots, if still present.
Removal of any asbestos pipe/fitting insulation that are currently exposed (in Closets, Storage Rooms, crawlspaces, etc.) and/or will be made accessible and exposed doing the drop ceiling (2’x2” or 2’x4”) removal by others.
The work shall be performed within full containments with 3-stage Decontamination Chamber. Finals are to be analyzed by TEM analysis with immediate turn around. Work shall be performed utilizing approximately twenty (20) containments.

Bates Art Center:
Removal of approximately 13,000 sq. feet of asbestos mastic dots/patties above the drop ceilings located throughout the Classrooms (300, 301, 302, 303, 401 & 402), Hallways & Dance Room 402. Removal of the 1’x1’ ceiling tiles adhered to the mastic dots, if still present. No mastic dots were observed in Dance Room 403.
Removal of any asbestos pipe/fitting insulation that are currently exposed (in Closets, Storage Rooms, crawlspaces, etc.) and/or made accessible and exposed doing the drop ceiling (2’x2” or 2’x4”) removal by others.
The work shall be performed within a full containment with 3-stage Decontamination Chamber. Finals are to be analyzed by TEM analysis with immediate turn around. Work shall be performed utilizing four to five (4 to 5) containments.

The removal of all drop ceiling systems (2’x2’, 2x4’ & plaster) shall be performed by others, prior to the start of the abatement work.

Start Date:

Number of Days:

Bates Middle - ~ Two hundred (200) working days
Bates Art Center - ~ Twenty five to thirty (25 to 30) working days

APEX Business Solutions, LLC - Non-Responsive

It is recommended that the Board award Pittsville Elementary-Middle School Roof Replacement and Restoration to D Project as the evaluated low responsive and responsible Bidder pending approval of the Interagency Commission on School Construction.

**SOURCE OF FUNDS:** FY 22 Healthy Schools Facility Fund Capital Outlay
Item 1C. Approval of Revisions to Previously Approved Contracts

Motion:
To approve the revisions to previously approved contract awards as presented.

Background Information:
December 8, 2022 - Contract Awards
Change is to correct state participation approved at the December 8, 2022 IAC Meeting.
Calvert County - Plum Point MS
PSC 04.017.23
Project Type: Systemic Renovation
Change State funds from $2,144,800 to $1,895,920
Change Local funds from $1,685,200 to $1,934,080
Motion:
To approve the reuse of the existing Center of Applied Technology - North site of 55.36 acres owned by the Anne Arundel County Board of Education (AACBOE) at 800 Stevenson Road, Severn, MD, 21144 (Parcels 1 and 3 of Tax I.D. # 02-04-00090036241, Liber 2274, Folio 442), for the construction of a replacement for Old Mill North Middle School with a scheduled completion in Fall 2027; adhering to the actions identified in the state clearinghouse review, state application identifier MD20221007-0792.

Background Information:
The Anne Arundel County Board of Education (AACBOE) is requesting site approval to construct the Old Mill North Middle School replacement at 800 Stevenson Road. This parcel has been owned by AACBOE since 1969 and is where the Center of Applied Technology - North (CATN) building is currently located. Per the Old Mill Complex Master Plan, which was approved by the IAC on June 2, 2020 as part of the waiver of the feasibility study requirement, CATN will be relocated to the current Old Mill HS/MS site. AACPS plans to serve approximately 1,199 students in grades six through eight in the new Old Mill North Middle School at an estimated cost of $100.3 million.

State Clearinghouse review was completed in November 2022. The AACBOE approved the site on September 6, 2016 as part of the Old Mill Complex Master Plan approval.

Land Use and Infrastructure
- The site is in the County’s PFA.
- Current zoning is R5 – Residential (low-medium density single-family detached residential development). Properties surrounding the site are zoned R-5 and R-2 (low-density suburban single-family detached residential development).
- Public water, sewer, natural gas, and electric service already serve the CAT North facility.
- No identified road frontage improvements will be required to provide access to the site.
- CATN is currently served by a closed storm drain system. The drainage from the paved areas is collected at several inlets located throughout these areas and conveyed to a pipe located along the eastern edge of the driveway. Any new construction that occurs will be required to meet the requirements established by the Stormwater Act of 2007. These requirements establish a process by which new construction needs to utilize sustainable or environmental site design to the maximum extent possible to satisfy water quality requirements.
Environmental and Natural Settings

- The site is not located within a 100-year floodplain.
- There is one identified wetland area on the sites located in the northwestern portion of Parcel 435 (CATN) and are considered palustrine forested wetlands.
- No known rare, threatened, or endangered species of plant or animals or habitats are known to exist on or near the site.
- No steep slopes on the site will be disturbed.
- The site is partially forested and will be partially cleared during the construction process. No Forest Conservation Easements currently exist at the site; however, a Forest Stand delineation is underway and forest conservation plans will be required as part of the development process.
Item 1E. Baltimore County Public Schools – Site Approval – Deer Park Elementary School

**Motion:**
To approve the acquisition and use by the Baltimore County Board of Education (BCBOE) of 14.86 acres of land at 9809 Lyons Mill Road, Owings Mills, MD, 21117 for the construction of a replacement for Deer Park Elementary School; adhering to the actions identified in the state clearinghouse review, state identifier MD20211122-0884.

**Background Information:**
BCBOE is requesting site approval to build a replacement for Deer Park Elementary School at 9809 Lyons Mill Road in Owings Mills.

The site area currently includes several adjacent, publicly owned parcels at the southeast corner of Lyons Mill Road and Marriottsville Road in Owings Mills. Some are owned by the BCBOE, and some are owned by the Baltimore County Department of Recreation and Parks.

Upon IAC approval, BCBOE will coordinate with the Department of Recreation and Parks to consolidate and swap the parcels. Once this process is complete, the parcels owned by BCBOE will include the Deer Park site and all educational facilities and functions, and the parcels owned by the Department of Recreation and Parks will include the county-owned park and recreational facilities in the vicinity.

Deer Park Elementary School is being designed for pre-kindergarten through fifth grade with a capacity of 735 students. It would be located on a portion of the site directly to the west of the existing elementary school that is currently occupied by athletic fields and owned by the Department of Recreation and Parks.

When the project is completed, the existing school will be demolished and athletic fields will be constructed on the existing school site. This arrangement is part of the land swap between the agencies.

State Clearinghouse review was completed in December 2021. The BCBOE approved the site on September 13, 2022.

**Land Use and Infrastructure**
- The site is in the County's Priority Funding Area.
- Current zoning is DR (Density Residential) 3.5. The site is adjacent to the existing elementary school.
- Public water, sewer, natural gas, and electric service are available at the site.
Environmental and Natural Settings

- The site is not located within a 100-year floodplain.
- No known rare, threatened, or endangered species of plants, animals, or habitats are known to exist on or near the site.
- Steep slopes on the site are located on a portion of the land that will not be disturbed.
- The site will implement Environmental Site Design (ESD) features (micro-bioretention, gravel wetlands) to comply with County and State requirements. Sediment control will consist of perimeter sediment filtering devices as well as a centrally located sediment filtering device to comply with County and State requirements.
Item 1F. Built to Learn Act Project Status Report

**Motion:**
This item is informational and does not require IAC action.

**Background Information:**
Please see the details regarding BTL allocations, report key, and attached report dated as of December 28, 2022 - *Built to Learn Act Project Status Report.*

**BTL Project Status Report Key**

This report displays the current status of BTL projects that have been approved by the IAC.

The Delivery column indicates the type of project delivery method:
- **O/B**: Owner / Builder. The LEA acts as the prime at-risk construction manager (general contractor) and directly contracts with the trade contractors. The LEA may engage a not-at-risk construction manager to act as its agent to assist with the management of the project.
- **CMAR**: Construction Management At-Risk. The LEA engages an at-risk construction manager that will become the prime general contractor before the schematic design phase begins to gain the value-added benefits of ensuring design/construction viability and design cost effectiveness and for a turn-key project delivery within a guaranteed maximum price (GMP).
- **DBB**: Design-Bid-Build. The LEA utilizes the “traditional” sealed bid delivery method where the successful at-risk prime general contractor delivers the project turn-key for a fixed price based upon fully complete project documents.

The percentage within each box indicates the level of progress of that phase and the color indicates the degree to which the activities in that phase are/were on schedule based upon the LEA’s initially submitted project schedule (generally from the schematic-design submission).

<p>| % | Phase completed or on track to be completed ahead of scheduled date. |
| % | Phase completed or on track to be completed within 2 months of scheduled date. |
| % | Phase completed or on track to be completed between 2 - 4 months of scheduled date. |
| % | Phase completed or on track to be completed more than 4 months after scheduled date. |</p>

Item 2. Adoption of Final 14.39.02.06 COMAR Revisions

Motion:
To adopt the final COMAR Revisions as published in the November 4, 2022 Maryland Register (Volume 49, Issue 23, Page 1011).

Background Information:
The IAC approved the proposed COMAR 14.39.02.06 revisions for publication at their meeting on August 11, 2022.

After publication of the November 4, 2022 Maryland Register, the COMAR revisions were open to public comment for 30 days, ending on December 5, 2022. The IAC did not receive any public comment on this item.

IAC staff recommends the final adoption of the proposed actions on regulations as published in the November 4, 2022 Maryland Register.

Next Steps: If approved by the IAC, notice will be published in the Maryland Register that the IAC adopted the proposed regulations as amended. The regulations go into effect 10 days after publication.
Notice of Proposed Action

The Interagency Commission on School Construction proposes to adopt amendments to Regulation .06 under COMAR 14.39.02 Administration of the Public School Construction Program. This action was considered by the Interagency Commission on School Construction at an open meeting held on August 11, 2022, notice of which was given by publication on the Maryland General Assembly website pursuant to General Provisions Article, §3-302(c), Annotated Code of Maryland.

Statement of Purpose

The purpose of this action is to codify changes to limit the applicability of excess capacity in an adjacent school only if the sum of available seat count in all adjacent schools is 15 percent or more of the project school’s enrollment in accordance with Ch. 32, Acts of 2022.

Comparison to Federal Standards

There is no corresponding federal standard to this proposed action.

Estimate of Economic Impact

The proposed action has no economic impact.

Economic Impact on Small Businesses

The proposed action has minimal or no economic impact on small businesses.

Impact on Individuals with Disabilities

The proposed action has no impact on individuals with disabilities.

Opportunity for Public Comment

Comments may be sent to Jonathan Borghetti, Policy Analyst, Interagency Commission on School Construction, 200 W. Baltimore Street, Baltimore, MD 21201, or call 410-767-0742, or email to jonathan.borghetti@maryland.gov, or fax to 410-333-6522. Comments will be accepted through December 5, 2022. A public hearing has not been scheduled.

Open Meeting

Final action on the proposal will be considered by the Interagency Commission on School Construction during a public meeting to be held on January 12, 2022, at 9 a.m., at the link available at mdschoolconstruction.org.

.06 Maximum State Construction Allocation.

A.—D. (text unchanged)

E. Gross Area Baselines.

(1) (text unchanged)

(2) The approved student enrollment may be reduced only if the sum of available seat count in all adjacent schools is 15 percent or more of the project school’s enrollment.

[22-200-P]
Item 3. Healthy School Facility Fund FY 2023 Extension Request and Administrative Procedure Guide and Attachment 1 Baltimore City Public School System’s Schedule for Application and Approval of Project Funding Revisions

Motion:
To approve revisions to the Healthy School Facility Fund (HSFF) Administrative Procedures Guide (APG) as shown in the presented draft document.

Background Information:
IAC Staff recommend the presented changes to the FY 2023 HSFF APG in order to clarify procurement requirements, particularly around prevailing wage, and to extend the Baltimore City deadline for application submission.

2021 revisions to the State Finance and Procurement Article §17-202 (2021 Md. Laws, Chapter 57) decreased the threshold above which prevailing wage rates are applicable to public work projects from $500,000 to $250,000.

On December 21, 2022, Baltimore City Schools requested to extend their submission deadline for their HSFF FY23 projects by three months from the original submission date of November 30, 2022 to February 28, 2023. The extension would allow City Schools to submit projects to be reviewed for recommended approval for the use of Federal funds that are limited for Heating, Ventilation, and Air Conditioning projects. Md. Code, Education Article § 5-322(j)(1)(iii) and (k)(4), provides for Baltimore City Public School System (BCPSS) to receive at least 50% of funds appropriated to the fund in Fiscal Years 2021 through 2024 through a separate application process specifically for BCPSS.
December 19, 2022

Mr. Alex Donahue  
Executive Director  
Interagency Commission on School Construction  
200 West Baltimore Street  
Baltimore Maryland 21201

RE: Healthy Schools Facilities Funds (HSFF) request FY23  
Request for submission extension

Dear Mr. Donahue:

On November 22, 2022, City Schools submitted 23 window and door projects and 5 roof projects, for our FY23 Healthy Schools Facilities Fund funding. However, we were recently informed that $20M of the allocation dedicated to City Schools comes from Federal funding, and that it must be used for HVAC projects instead of the typical allowable HSFF projects. Unfortunately, City Schools was unaware that this restriction existed, and did not submit any HVAC projects.

We would like to respectfully request an extension to the deadline for submitting our HSFF request, until February 28, 2023, to allow us to review our system needs and to submit HVAC projects for this $20M of funding. We would also like to request that the IAC review and consider the first four priority projects submitted within the HSFF projects submitted, as they fall under the original HSFF requirements for the first $25M allotted.

We appreciate your consideration, and thank you for your continued support in addressing the needs for Baltimore City Schools. If you have any questions or concerns, please contact me at csmith03@bcps.k12.md.us.

Sincerely,

Cynthia S. Smith  
Executive Director – Facilities Planning, Design, and Construction

2. **Purpose**
   The purpose of the Healthy School Facility Fund is to provide grants to public primary and secondary schools for capital projects that will improve the health of school facilities. This includes projects that will improve the conditions related to air conditioning, heating, indoor air quality, mold remediation, temperature regulation, plumbing—including the presence of lead in drinking water outlets, roofs, and windows. Grants will be prioritized to projects that correct issues posing an immediate life, safety, or health threat to occupants of a facility.

3. **Background**
   Established as a new program by legislation in calendar year 2018 and modified in 2021, Education Article §5-322, Annotated Code of Maryland, requires the IAC to administer the HSFF, approve expenditures, and develop administrative procedures for the grant program. The Governor is required to provide in his budget an annual allocation of $30 million for the program in Fiscal Years 2020 through 2022, and at least $40 million in Fiscal Years 2023 and 2024.

4. **Allocations - General**
   4.1. **General**

   4.1.1. For each fiscal year that funds are available, the IAC will distribute allocations based on a competitive application process.
4.1.2. Only eligible project requests submitted in accordance with this Administrative Procedures Guide will be considered for funding.

4.1.3. All approved projects will have a local match requirement, based on the State-local cost share percentage applicable to projects approved in the Capital Improvement Program fiscal year. See COMAR 14.39.02.05 or the IAC’s website for State cost share percentages.

4.1.3.1. The LEA is required to have local funds available for the payment of cost in excess of the State allocation and ineligible project cost.

4.1.3.2. State participation will be based on the total estimated cost of the project, less ineligible items.

4.1.4. A project allocation remaining after final reimbursement of an approved project will revert to the Fund for redistribution to other eligible statewide projects.

4.2. Approval Basis

4.2.1. Funding priority will be based first on the severity of an immediate life, safety, or health environmental risk, and second on the following defined categories of work in the following order:

4.2.1.1. Lead in water, prioritized first to projects related to elementary school age children and second to highest levels of lead. The following help define the projects that will be considered:

4.2.1.1.1. A level of lead at sources where water is normally ingested that exceeds 5 parts per billion (ppb). Please note that levels of lead exceeding 20 ppb are considered an immediate life, safety, or health environmental risk and will be prioritized alongside other high priority projects per 4.2.1 above. Levels must be documented through a process administered by MDE.

Examples:

i.i. Water Fountains or Bubblers; followed by

i.ii. Faucets or taps that are used or potentially used for drinking or food preparation;

i.iii. Ice Makers; and

i.iv. Hot Drink Machines;

4.2.1.2. Roofs.

4.2.1.3. Lack of, unreliable, or insufficient air-conditioning, with priority given to schools that do not have any air conditioning.

4.2.1.4. Unreliable or insufficient heating.
4.2.1.5. Temperature regulation.
4.2.1.6. Plumbing, including pipe insulation to reduce condensation in order to prevent mold.
4.2.1.7. Indoor air quality, including remediation of indoor pollutants; and
4.2.1.8. Windows.

4.2.2. Additional priority consideration will be given to projects in elementary schools and special-education schools, followed by middle schools and high schools in that order.

5. Application and Approval Procedures

5.1. General Requirements

5.1.1. In accordance with Md. Code, Education Article § 5-322(j)(1)(iii) and (k)(4), the Baltimore City Public School System (BCPSS) will receive at least 50% of funds appropriated to the fund in Fiscal Years 2021 through 2024 through a separate application process specifically for BCPSS. See Section 5.3 for BCPSS Submission Requirements.

5.1.2. Projects must be received by the application deadline. Applications may be received within the 30 days preceding the deadline but they will not be reviewed for approval until the date provided by the IAC in its annual publication of the Schedule.

5.1.3. All project requests must be accompanied by supporting documentation, such as the results of lead testing as conducted per the requirements of State and federal regulations, mold testing reports by licensed industrial hygienists, elevated moisture content testing reports, indoor air quality assessment reports, and work order history.

5.1.4. Project requests should identify the following in the description:
   5.1.4.1. All work proposed;
   5.1.4.2. The origin, or source of the issue and the cause;
   5.1.4.3. How the cause will be corrected;
   5.1.4.4. Description of attempts previously made to correct the deficiency; and
   5.1.4.5. Plan for how the issue will be prevented from reoccurring.

5.1.5. The project schedule should indicate that:
   5.1.5.1. The project funds will be encumbered on or before the date shown in the program schedule. All work on the project will be substantially completed and a majority of the project funds will be expended by the date shown in the program schedule.
5.2. **Roof Replacement Applications**

5.2.1. Requests for roof replacement must be accompanied by supporting documentation, including:

5.2.1.1. The reports from any roof inspections conducted during the last 36 months;

5.2.1.2. The preventive-maintenance plan for the roofing system;

5.2.1.3. All preventive and corrective work orders pertaining to the roof from the last 36 months;

5.2.1.4. All information about the roof from any contractors or vendors that have provided service on the roof during the last 36 months;

5.2.1.5. Drawings of the area to be repaired/replaced to include measurements of the affected square footage and all rooftop units in the affected area(s); and

5.2.1.6. The expected-useful-lifespan (EUL) and most recent remaining-useful-lifespan (RUL) figures pertaining to all portions of the facility's roof as recorded in the IAC's statewide facilities assessment database.

5.3. **Baltimore City Submission Requirements**

5.3.1. Requests for Baltimore City will be considered and approved based on the same programmatic requirements as other LEAs’ requests, but will not be prioritized with other LEAs’ requests. Baltimore City requests and projects will be delivered in accordance with the schedule published annually by the IAC on its website and included here as Attachment 1.

6. **Eligible Projects/Expenditures**

6.1. Eligible project expenditures within the HSFF are for improvements to public school buildings used for education.

6.2. Each project’s cost is to be not less than $3,000, unless otherwise approved by the Executive Director of the IAC.

6.3. A single “project” is defined as:

6.3.1. A single improvement at an individual school that costs at least $3,000, unless otherwise approved by the Executive Director of the IAC.

6.3.2. Multiple improvements at the same school that collectively cost at least $3,000, unless otherwise approved by the Executive Director of the IAC.
6.3.2.1. Individual components within a project may be less than $3,000 in value, but the total cost of a project (including related components) must be at least $3,000 in value, unless otherwise approved by the Executive Director of the IAC.

6.3.2.2. Components must be identified separately in the application, with the estimated construction value shown.

6.3.3. Multiple improvements of the same kind at different schools, such as remediation of lead at drinking fountains

6.3.3.1. The cumulative cost of the improvements across multiple schools that collectively cost at least $3,000, unless otherwise approved by the Executive Director of the IAC.

6.3.3.2. Each school must be requested separately and the amount of the requests should be based on specific estimates for each school with the number of requested units, square footage, or some other method.

6.4. Design and other planning professional expenses. However, please note that projects that have not been designed must be executed based upon the program schedule.

6.5. Certain related components or systems that are logically related to the scope of work may be included in the scope, but the majority of the proposed work must be for environmental improvements.

6.6. An eligible contract (including design, construction, or other eligible services) for a locally funded project that is approved by the local board of education within 18 months prior to the IAC allocation approval date identified in the schedule (see attachment 1).

6.7. Unlike typical CIP projects, requests may be submitted for projects:

6.7.1. In schools that have been built or fully renovated within the last 15 years;

6.7.2. In which the anticipated life of the system or components is less than 15 years due to anticipated changes in technology; or

6.7.3. In locally owned and State-owned relocatable classrooms.

6.7.4. That were encumbered in the six months prior to release of Fiscal Year LEA allocations by the IAC.

7. **Ineligible Projects/Expenditures**

7.1. To replace the local share of a project;

7.2. For improvements to property owned by a board of education that is not used by public school students, e.g. garages, central office facilities, staff training quarters, etc., unless approved by the Executive Director of the IAC;
7.3. For the movement of relocatable classroom buildings, unless it can be shown that the location of the relocatable classrooms impedes correcting the health of the facility;

7.4. For ancillary services, e.g. post-completion monitoring;

7.5. For staff training, post-completion;

7.6. For salaries of local employees; or

7.7. Heating, ventilation, and air conditioning (HVAC) projects in gymnasiums and auditoriums, except when approved by the Executive Director in instances where the space serves as a teaching station for students with critical special needs or has direct impact on education services such that the school has to be closed.

7.8. Any contract for an eligible project that is approved by the Local Board of Education more than 18 months prior to the IAC allocation approval date identified in the schedule (Attachment 1).

8. **Project Approval Process**

8.1. Projects will be reviewed, prioritized, and approved by the IAC within 45 days of the submission due date as shown in the schedule published annually by the IAC.

8.2. Upon approval, IAC still will provide to the LEAs a final accounting of approved project allocations. **Federal fund allocations may require additional reporting and contract cost thresholds, as applicable.**

9. **Design Review**

9.1. A level of review required will be assigned during the submission approval process. Projects approved in the HSFF are generally subject to design development and/or construction document review as required for similar projects in the CIP.

**Review level submission requirements are as follows:**

0 – No review required by MSDE or DGS.
1 – Construction documents required for DGS review.
2 – Design development documents/construction documents required for DGS review.
3 – Abbreviated educational specifications, schematic drawings, design development documents/construction documents required for MSDE/DGS review as applicable.

9.2. IAC will consult with MDE and projects that abate lead may be reviewed by MDE.
10. **Procurement**

10.1. Procurements shall be in compliance with COMAR 14.39.03 as well as with State public school procurement law, Md. Code, Education Article §5-112, “Bids.” The following will apply to HSFF projects†, including:

10.1.1. Projects allocated federal funding for contracts of $2,000 or more require application of the Davis-Bacon Act labor standards. Contracting agencies have the primary responsibility for the enforcement of Davis-Bacon and related acts to ensure that laborers and mechanics are paid at least the prevailing wage rates required on covered contracts. The applicable wage determination will be the Davis-Bacon wage determinations as of the date of contract award (or within 10 days of the bid solicitation, in the case of competitive sealed bidding).

10.1.2. Projects which cost less than $50,000 do not require IAC approval of the procurement, and, generally, sealed bids are not required unless local board of education policy or procedures specify a minimum dollar value that requires sealed bids.

10.1.3. Projects that cost at least $50,000 but less than $100,000 are required to be competitively procured, consistent with Md. Code, Education Article Section § 5-112, Bids. For projects with a total cost of less than $100,000, IAC approval of contracts is not required prior to entering into the contract but the award is subject to State review at the time reimbursement is requested. A copy of the bid tabulation must be submitted with IAC/PSCP Form 306.2, Request for Reimbursement to LEA for the HSFF project.

10.1.4. Projects that cost $100,000 or more are required to be competitively procured, consistent with Section Md. Code, Education Article, §5-112, Bids. IAC approval of the contract award is recommended prior to the board of education entering into the contract. A copy of the bid tabulation indicating the responsible bidder who provides the best value and conforms to certain specifications bidder's proposal must be submitted for State review and approval of the contract award.

10.1.5. Competitive procurement requirements;

10.1.6. Minority Business Enterprise requirements;

10.1.7. Prevailing wage rates as applicable; If a HSFF project is estimated to cost $500,000 or more and State funds are estimated to be 25% or more of the project cost and federal funds are less than $2,000, the State prevailing wage law is applicable. The appropriate wage rates must be requested from the Department of Labor, Licensing and Regulation (410-767-2357), included in the bid documents and referenced in the advertisement for bids.

10.1.8. Maryland Historical Trust (MHT) consultation on applicable projects;

10.2. If multiple projects are procured under a single contract award where the total contract cost exceeds $100,000, each project will require a submission of IAC/PSCP form 303.3 Approval of Construction Contract Award for review and approval by the IAC.

---

† Please note that the thresholds for applicability of prevailing wage may change from time to time. The LEA is responsible for procuring projects in compliance with statutory and regulatory federal, State, and local requirements regardless of the guidance published in this Procedures Guide.
10.3. Due to the nature of HSFF projects, a construction sign is not required on site while the work is being performed.

11. Contract Award

11.1. At the time of contract award, the LEA may request the IAC to approve realignment of the HSFF funds among their approved projects.

12. Processing for Payment/Financial Reporting

12.1. Payment will be made through reimbursement to the school system, at time of 100% project completion, using IAC/PSCP Form 306.2, Request for Reimbursement to LEA.

12.2. Recognizing that reimbursement only at the time of project completion may create cash flow difficulties for some jurisdictions with larger projects, the IAC, upon request, will process progress payments on projects of $100,000 or more that received IAC Approval of Contract Award. If the IAC makes progress payments directly to a contractor for a jurisdiction for a specific project, then IAC/PSCP Form 306.1 Request for Payment to Contractor should be utilized.

12.3. IAC/PSCP Form 306.6 Close-Out Cost Summary package submission will only be required at time of project completion for projects that exceed $100,000 and utilize the direct payment to contractor option. All projects that were reimbursed at time of project completion do not require submission of the Close-Out Summary package.

13. Step by Step Instructions for Submitting Applications

13.1. Navigate to https://app.smartsheet.com/b/form/c5d8add924294497af843648ab17b8c6

13.2. Select the appropriate Funding Year from the dropdown. You can choose any year from 2022-2024. Please note that applications received for fiscal year 2022 (June 30, 2021 to July 1, 2022) may be funded with FY 2021 funding, based upon project specifics and approved by the IAC.
13.3. Enter date or click icon to open calendar. Today’s date will be highlighted.

13.4. Select the priority for the project from the dropdown. If there is one project for which you’re applying, select 1. If you have more than one, rank them on a numerical scale (1, 2, 3, 4…)
13.5. Type in the PSC Number for the facility in XX.XXX format.

13.6. Type in the School/Facility Name.

13.7. Select Project Type from the dropdown list. If you want to select more than one you must submit an additional application, and prioritize the projects as detailed above.
13.8. Select county name from the dropdown list.

13.9. Enter the Description/Justification for the project. There is no character limit.
13.10. Select Yes or No from the dropdown to indicate whether the school facility closed at list once during the previous or current school year.

If you select “Yes” a new dropdown box will appear for you to select the number of times the facility was closed due to the issue identified in the application.

From the dropdown list, select the number of times the facility was closed during the school year due to the health and environmental risks identified in the project scope of work.
If you selected No move on to the next item.

13.11. Enter or select the date the project was previously funded with State dollars. If there has never been prior funding leave the field blank and move on to the next item. (Note: This date must always be prior to today’s date.)
13.12. Enter details for Scope, Alternative Solution, and What caused the problem. Several lines of text will be showing but there is room for overflow and no character limit.

13.13. Click checkboxes to indicate consequences of inaction on this project. You may select one item from the list, more than one item, or all items.
13.14. Click dropdown to select Yes or No to indicate whether design has been completed.
13.15. If you selected **Yes** a Date field will appear to allow you to enter or select the date design documents were or is estimated to be submitted.

If you selected **No** a date field will appear to allow you to enter or select the date design completion is anticipated.
13.16. Click the dropdown to select whether design funding is being requested as part of the application.

13.17. Enter in dollar amounts the LEA's estimated Total project Cost, LEA Design Funding being requested (If none, enter 0), State HSFF funding requested, and the approved amount of Local HSFF funding.
13.18. Enter the date you expect work to begin, or select it from the calendar date picker.

![Calendar for selecting dates](image)

13.19. Enter the date you expect work on the project to be completed, or select it from the calendar date picker.

![Calendar for selecting dates](image)
13.20. Enter the name and email address of the person designated to respond to project inquiries. This person will be the IAC staff's primary point of contact.

13.21. If you have any documents to support your application, upload them into the box shown below. You can drag and drop the files or click the “browse files” link to navigate to wherever the files are stored and upload them from there.

When documents are received you will be able to confirm by seeing them listed by file name.

13.22. Click the submit button at the bottom of the application.
13.23. Upon successful submission you will receive a confirmation message and the application will be cleared and ready to be filled out again.

If you have additional projects for which you wish to apply, enter them below using these same instructions.

Remember to not use the same Priority you used on your previously submitted application(s). If you are finished filling out the application you may navigate away from this page.

13.24. If an application has been submitted in error, please notify the IAC via email at iac.pscp@maryland.gov and the request will be deleted; “Canceled“ status indicates the project was previously “Approved” then later “Canceled”.
Attachment 1
Schedule for Application and Approval of Project Funding

FY 2023 Healthy School Facility Fund State and Federal Funds (Schedule A)

04/14/2022 IAC Approval of the Healthy School Facility Fund (HSFF) Administrative Procedures Guide & Release of Schedule and Application Instructions

04/14/2022 - 06/17/2022 Application Submissions Due

06/20/2022 - 08/05/2022 IAC Staff Review Period

09/08/2022 IAC Approval of Projects and Allocations

06/01/2024 All project funds to be encumbered

10/01/2024 Deadline for Funds to be substantially expended

05/01/2025 Last day to submit requests for reimbursement

Baltimore City Public School System’s Schedule for Application and Approval of Project Funding

Baltimore City FY 2023 Healthy School Facility and Federal Funds (Schedule B)

04/14/2022 IAC Approval of the Healthy School Facility Fund (HSFF) Administrative Procedures Guide & Release of Schedule and Application Instructions

04/14/2022 Application Submission period opens

11/30/2022 02/28/2023 Application Submission period closes

For deadlines to encumber projects, to substantially expend projects, and to submit requests for reimbursement of projects, please see Schedule A.
Item 4. Baltimore City Public Schools - FY 2023 Healthy School Facility Fund Approval of Project Allocations

**Motion:**
To approve Fiscal Year 2023 Healthy School Facility Fund (HSFF) project allocations for Baltimore City Public Schools (BCPS) totaling approximately $25 million in new authorization as presented in Table 1.

**Background Information:**
Funding through the HSFF program is distributed to projects that improve the environmental health of Maryland’s public school facilities and are based on the prioritization of project categories as outlined in the Administrative Procedures Guide. To address this need, staff recommend approval of the presented project allocations totaling approximately $25 million.

Total funding sources available for the FY 2023 Healthy School Facility Fund program include:
1. $50 million in new authorization.
2. $40 million through the FY 2023 American Rescue Plan Act (ARPA) which stipulates that funding be used to address Heating, Ventilation and Air Conditioning projects. Funding distributed through ARPA requires that federal reporting and contract cost thresholds are met.

In accordance with Education Article § 5-322(a)(1)(iii) and (k)(4), BCPS is mandated to receive at least 50% of each fiscal year HSFF allocation in fiscal years 2021 through 2026 through a separate application process. For FY 2023, this equates to $45 million, including $25 million in new authorization and $20 million in federal ARPA funds. HSFF allocations for other Counties were approved by the IAC at the September 8, 2022 IAC meeting.

To utilize the remaining $20 million in ARPA funds, BCPS will submit additional FY 2023 HSFF HVAC related project requests (contingent upon IAC approval of APG revisions that will extend the deadline for submission included in Item 3 of this agenda).

Item 5. Use of Bond Proceeds for Capital Improvements in Leased Public School Buildings

Motion:
To direct staff to develop a policy for the use of certain bond proceeds, including Capital Improvement Program funds and Pass-Through grant funds, for capital improvements requested by Local Education Agencies in facilities that are leased to Local Education Agencies or charter school operators for use as public schools. Staff will present the policy to the Commission in a subsequent meeting for review and approval as a Commission policy.

Background Information:
The Blueprint for Maryland's Future is a set of laws that emerged from the recommendations of the Commission on Innovation and Excellence in Education (known as the Kirwan Commission) beginning in 2016. The Accountability and Implementation Board (AIB) is responsible for ensuring successful implementation of the Blueprint laws. One of the elements of the AIB’s Comprehensive Implementation Plan, adopted December 1, 2022, is expanded access to full-day pre-kindergarten and career and technical education. Local Education Agencies have expressed to IAC staff a need for additional space for these programs and have identified leased space as a potential solution. The leased facilities will often require capital improvements before they can be used as public school facilities.

Charter school operators often lease facilities for use as their charter school facilities. These facilities also often require capital improvements before they can be used as public charter school facilities.

Bond proceeds may not be used for operating costs such as rent payments, utility costs, or salaries. Projects using bond proceeds must be used for the stated public purpose for at least the life of the bond. The policy developed by staff will include restrictions required by bond counsel and approved by the State Treasurer’s Office.
